

FEDERAL COMMUNICATIONS COMMISSION

Washington, DC 20554

January, 2000

TO: All Broadcasters, Cable Operators and Designated Officials in the State of Louisiana

SUBJECT: Louisiana State EAS Plan

Enclosed is a copy of the Emergency Alert System (EAS) procedures for the State of Louisiana. This plan was developed by the Louisiana State Emergency Communications Committee and conforms to the FCC EAS rules and regulations and enhances the National level EAS. We commend the volunteer effort of the committee members in developing an excellent plan.

Designated officials will utilize the facilities described in the plan to relay State and local EAS activation or test messages. We urge you to read the plan and become familiar with the operational aspects of the State EAS,

Any questions you have may be directed to the State EAS Chair: Mr. Larry Ward, Louisiana Public Broadcasting, 7733 Perkins Road, Baton Rouge, LA 70810, (225) 767-4203, lward@lpb.org; or to the FCC at (202) 418-1226, EAS@fcc.gov.

The FCC has authorized all broadcast stations and cable systems, regardless of their EAS designations, to activate the EAS by transmitting the EAS digital signal, two-tone attention signal, emergency information and end-of-message digital signal. The FCC considers the EAS to be a valuable public service and appreciates your participation.

Sincerely,

Frank Lucia
Special Advisor, EAS
Technical and Public Safety Division
Enforcement Bureau

PURPOSE

The purpose of this document is to explain and provide procedures for the broadcast and cable services and designated government officials of Louisiana to disseminate emergency information and instructions in threatened or actual emergencies.

AUTHORITY

Title 47 U.S.C. 151, 154(i) and to), 303(r), 524(g) and 606; and 47 C.F.R. Part 11, FCC Rules and Regulations, Emergency Alert System (EAS) as pertains to day-to-day emergency operations.

INTRODUCTION

These procedures were prepared by the Louisiana State Emergency Communications Committee; the Louisiana Office of Emergency Preparedness; the Federal Communications Commission; the National Weather Service in Slidell, Lake Charles, Shreveport, and Jackson MS; State and local officials; and the broadcasters and cable operators of Louisiana. It provides background data and prescribes specific procedures for the broadcast and cable media to issue emergency information and warning to the general public in Louisiana or any portion thereof within the broadcast coverage and cable system service area, at the request of designated State and Federal government officials.

Acceptance of, or participation in this plan shall not be deemed to prohibit a licensee or cable operator from exercising his independent discretion and responsibility in any given situation. The concept of management of each broadcast station or cable system to exercise discretion regarding the transmission of emergency messages and instructions to the general public is provided by the FCC Rules and Regulations, Part I-. Broadcast stations and cable systems originating emergency communications shall be deemed to have conferred rebroadcast authority as specified in Section' 11.54(d).

Detailed procedures, agreed upon by the broadcast and cable industries and the local area governments, which will permit designated government officials to issue local emergency messages and instructions, via the EAS in threatened or actual emergencies, are attached to this plan as individual appendices for each EAS local Area.

GENERAL CONSIDERATIONS

The listening and viewing habits of the public are inherent factors of consideration and are conducive to the positive effectiveness of the EAS. The instinctive reaction of the average person is to turn on his radio or television set.

Time of emergency. However, continuing public education is required to increase public awareness of the Louisiana EAS as an established medium for the receipt and distribution of emergency information to the general public at the local, State, and National levels.

DEFINITIONS

EMERGENCY: A situation posing an extraordinary threat to the safety of life and property. Examples are, but not limited to natural situations such as: tornadoes, flash floods, icing conditions. heavy snows, widespread fires: and manmade situations such as: discharge of toxic gases, widespread power failures. industrial explosions, civil disorders and nuclear incidents.

SEVERE WEATHER WATCH: A severe weather WATCH indicates that the probabilities of a particular severe weather storm are high, and is an alert to the public of such severe weather conditions.

SEVERE WEATHER WARNING: A severe weather WARNING indicates that a particular severe weather storm has actually been sighted in an area or indicated by radar, and serves notice to the public that severe weather conditions are almost certain to occur.

DESIGNATED GOVERNMENT OFFICIALS: The person or persons designated by governments signatory to this procedure to request activation of the EAS and to make emergency announcements (see Annex A).

ACTIVATION

The Louisiana EAS is activated by a request from authorized officials to the State's EAS State Primary (SP) sources. The SP sources, WFMF in Baton Rouge, Louisiana and are key with respect to activation of the EAS at the State level. All Local Primary (LP) sources in each EAS Local Area and State Relay (SR) sources should monitor the above SP sources, or according to the Louisiana EAS State Relay Network (see Annex F for further dissemination of State level emergency information to all other stations and cable systems and the public.

GENERAL PROCEDURES FOR BROADCAST STATIONS AND CABLE SYSTEMS

- A. When a severe weather WATCH is issued by the National Weather Service (NWS) for the State of Louisiana, stations and cable systems in Louisiana can receive hard copy of the WATCH over any of the following teletype networks:
 - Associated Press (AP)
 - NOAA Weather Wire.
- B. When a severe weather WARNING is issued by the NWS for the State of Louisiana, the NWS or an LOEP official will notify the SP sources (WFMF/WJBO) through NOAA Weather Radio, telephone, telephone hotline, or 800 MHz radio, etc.
- C. When a statewide emergency exists, the Governor or a designated official from the list provided to broadcasters and cable operators will determine whether or not to request activation of the Louisiana EAS through the State Primary sources.
- D. For unique emergency situations not involving the entire state, authorities may request EAS activation through the Local Primary (LP) source serving the affected EAS Local Area.
- E. The Louisiana State Emergency Communications Committee and the Louisiana Office of Emergency Preparedness will issue a list of authorized officials and authentication procedures for requesting activation of the Louisiana EAS (see Annexes A and B). These are published on a need to know basis.

COMMUNICATIONS BETWEEN THE LOUISIANA OFFICE OF EMERGENCY PREPAREDNESS, THE NATIONAL WEATHER SERVICE IN SLIDELL AND THE BROADCAST AND CABLE FACILITIES OF LOUISIANA

1. Commercial telephone and NAWAS Hotlines exists between the Louisiana Office of Emergency Preparedness, the NWS in Louisiana, and the broadcast and cable facilities of the state.

Telephone Numbers

State Primary (SP) source (WFMF/WJBO):

Governor's Office:

Office of Emergency Preparedness:

National Weather Service, Slidell:

National Weather Service, Lake Charles

National Weather Service, Shreveport

National Weather Service, Jackson, MS

2. Contact via a dedicated hotline between the Louisiana Office of Emergency Operating Center and the SP source at WFMF/WJBO.

IMPLEMENTATION

A. Procedures for Activating Officials.

1. Request activation of the EAS facilities through (WFMF/WJBO), the (State Primary sources), using prearranged authentication procedures (see Annex B) as soon as possible.
2. Work out program details (i.e., live or recorded, immediate or delayed) with broadcast and cable personnel.
3. It is recommended that government officials use the following format when delivering the emergency announcement. The format is deliberately general in nature to allow for the uniqueness of each emergency situation, yet broad enough to insure completeness. The audio emergency message cannot be more than two minutes long.
 - a. This is (e.g., Col. Brown, Assistant Director) of LOEP
(name/title) *(jurisdiction)*
with a request to activate the Louisiana Emergency Alert System." "I authenticate as follows: (SEE ANNEX B)."
 - b. Situation summary (describe the nature of the emergency).
 - c. Instructions or message to the public.
 - d. Actions being taken by state and/or local government(s).
4. **Keep line open if necessary.**
5. Issue Louisiana EAS Termination.

B. Procedures for Broadcast stations and Cable systems.

1. Upon receipt of a request to activate EAS at the state level, the operator at WFMF (State Primary source) will authenticate (see Annex B) and if possible begin recording all emergency messages and proceed as follows:
 - a. Transmit the following announcement:

**"WE INTERRUPT THIS PROGRAM BECAUSE OF A STATE EMERGENCY.
IMPORTANT INFORMATION WILL FOLLOW."**

- b. Transmit the Emergency Alert System header codes and Attention Signal: (FCC Regulations, Section' 11.51)T
 - c. Transmit the following announcement:
**"WE INTERRUPT THIS PROGRAM TO ACTIVATE THE LOUISIANA EMERGENCY ALERT SYSTEM
AT THE REQUEST OF LOEP AT 04:00.
(authority) (time)**
 - d. Make the emergency announcement. Repeat as necessary and include the source of information and time received.
 - e. If EAS operations are now concluded, transmit the EAS End of Message (EOM) code (see *PCC Regulations, Section' 11.31*). Otherwise keep program open and transmit the EOM code after the program is over.

Important Note: Broadcasters and cable operators have the option of transmitting only the EAS header and EOM codes without the Attention Signal and emergency announcement. This is acceptable so that EAS coded messages can be quickly relayed through areas unaffected by the emergency.

2. Each broadcast station and cable system, upon receipt of a State level emergency action notification will, at the discretion of management, perform the same procedures as outlined in B.1. above, including recording all emergency messages.
3. To avoid unnecessary escalation of public confusion, all broadcast stations and cable systems must be cautious in providing information and news pertaining to the emergency. All messages must be based on definite and confirmed facts. The public must not be left to decide what is or is not factual.
4. Upon completion of the above transmission procedures, resume normal programming. Appropriate notations should be made in station and cable records and logs of all significant events. These records should be carefully

preserved in the event they are required at some later date (FCC regulations, Section' 11.55). Stations and cable systems may send a very brief summary to the FCC for information purposes.

5. If operations were not concluded as specified in B. 1 .e. above, upon receipt of the termination notice from the activating official, make the following announcement and transmit the EOM code:

"THIS CONCLUDES OPERATIONS UNDER THE LOUISIANA EMERGENCY ALERT SYSTEM. ALL BROADCAST STATIONS AND CABLE SYSTEMS MAY NOW RESUME NORMAL OPERATIONS."

(Repeat announcement).

TESTS

Statewide tests of the Louisiana Emergency Alert System will be conducted monthly to assure the successful operation of the system. Tests will be initiated by the broadcast and cable chairs of the State Emergency Communications Committee in coordination with the Office of Emergency Preparedness.

NOTE: AS OF 5/23/97! THE REQUIRED MONTHLY TEST (RMT) IS NOW A STATEWIDE TEST. IT WILL BE ORIGINATED FROM THE STATE PRIMARY (SP), WLSS-FM IN BATON ROUGE.

1. ALL STATIONS AND CABLE SYSTEMS ARE TO RETRANSMIT. THE (RMT)/STATEWIDE TEST EXACTLY AS IT IS RECEIVED.
2. RETRANSMISSION MUST OCCUR WITHIN 15 MINUTES OF RECEIPT OR AT SCHEDULED TIMES LISTED.
3. IF YOU DO NOT RECEIVE THE (RMT)/STATEWIDE TEST WITHIN THE 15 MINUTE WINDOW OF THE TIMES LISTED BELOW, YOU MUST FIND OUT WHY AND MAKE AN ENTRY IN YOUR EAS RECORDS/LOGS.
4. THERE ARE NO EXCEPTIONS FOR NOT CONDUCTING THE (RMT)/STATEWIDE TEST SINCE THIS IS A REQUIRED EXERCISE OF THE EMERGENCY ALERT SYSTEM.
5. THE (RMT)/STATE NETWORK TEST WILL BE CONDUCTED AT TIMES DESIGNATED BY THE SECC AND LOEP.
6. REQUIRED MONTHLY TEST (RMT)/STATEWIDE TEST SCRIPT AND SCHEDULE:

7. *Procedure to follow:*

ANNOUNCEMENT: "This is a test of the Louisiana Statewide Emergency Alert System"

TRANSMIT: EAS digital Header codes with your EAS encoder, Two-Tone attention signal,

ANNOUNCEMENT: "This is a coordinated monthly test of the broadcast stations and cable systems of your area. Emergency Alert System equipment that can quickly warn you during emergencies is being tested. If this had been an actual emergency such as a tornado, flood, evacuation, toxic release or any emergency that you the public should be timely alerted, official messages would have followed the alert tone."

This concludes this test of the Louisiana Statewide Emergency Alert System."

TRANSMIT: End of message code with your EAS encoder. (EOM)
